ANNUAL REPORT FY 2018

LASSONDE ENTREPRENEUR INSTITUTE
THE UNIVERSITY OF UTAH

LIVE. CREATE. LAUNCH.

DAVID ECCLES SCHOOL OF BUSINESS
The second year in Lassonde Studios (L2) wrapped up in summer 2018, and it was even better than the first. Our L2 residents, student leaders and thousands of participants accomplished even more than we could have imagined. They launched startups, ideas, dreams and their futures. In this report, you will find some of the highlights from this incredible year and how students transformed their lives and education through entrepreneurship. Thanks to all of our sponsors and supporters. We’re growing a one-of-a-kind community, and we can’t do it without you.
"Lassonde is the very first program that made me think, where do I see myself in 50 years? In 10 years, in 25 years?"

— Liz Morales, ethnic studies and communications graduate

"I love that sense of community that Lassonde provides. I love the energy, I love the people, and I think what excites me most is that people here are driven."

— Logan Erickson, EAE film & media arts and computer science student

"The institute is looking for hungry, driven, passionate individuals from whatever medium it may be, whatever passion you may have, to come get involved and magnify that."

— Parker Andries, communications student
"I got to work with people from different academic programs and backgrounds. ... That was something that really helped me transfer my skills into industry."
— Katherine Aiello, bioengineering Ph.D. graduate

"The success of my company has been pretty amazing, to see it grow so fast and rapidly, and it’s just not stopping."
— Aidan Daoussis, entrepreneurship student

"Lassonde is all about opportunity, and it’s so cool to see everyone take advantage of that. I’ve been able to see a lot of girls going for it."
— Annie Connolly, modern dance student
"What if you could live, eat, sleep and build your startup from scratch, all in one spot? That's just reality for students living and working in Lassonde Studios at the University of Utah."
"Its mission is revolutionary: to bring budding student-entrepreneurs under one roof and to provide them with a range of services to create businesses."

"It all adds up to an ideal minimal-risk environment for students to explore the entrepreneurial world. Many student startups may not succeed. ... But here, failures are embraced as learning experiences."

"The year-old, $45 million Lassonde Studios building ... is an award-winning, copper-clad statement in modern architecture, featuring austere interiors heavy on concrete, stone and steel."
OUR HISTORY
2001-2018

We started with a single program in 2001 and have grown into a nationally recognized institute that now includes dozens of programs, and world-class faculty and facilities.

1973 — Pierre (MBA) and Claudette McKay (MS) Lassonde graduate from the University of Utah.

2001 — The Pierre and Claudette McKay Lassonde New Venture Development Center formed with a $100,000 gift from Pierre Lassonde. The center brings together business, engineering and science graduate students with university faculty inventors to develop commercialization plans.

2002-2003 — The first companies launched from the Lassonde New Venture Development Center. Those companies were in industries including medical imaging and pharmaceuticals.

2006 — The Lassonde Family Foundation gives $13 million gift to endow the Pierre and Claudette McKay New Venture Development Center, create the Pierre Lassonde Entrepreneur Center to promote student entrepreneurs and establish two presidential chairs in entrepreneurship. The donation expands the organization’s reach to include student business-plan competitions open to university students across the state with awards of $100,000 provided by Zions Bank.

May 2006 — Pierre Lassonde receives honorary doctorate from the University of Utah.

2006 — Pierre Lassonde receives honorary doctorate from the University of Utah.
2010 — University of Utah ranks as the No. 1 university in the country for startup formation based on faculty technologies. The Pierre and Claudette McKay Lassonde New Venture Development Center continues to grow with the addition of new programs, including the Foundry, a business discovery center, and Bench to Beside, a medical device competition.

2011 — The Lassonde program ranked among the top 25 in the country for entrepreneurship education by the Princeton Review.

2012 — The first students enroll in the new Lassonde Social Entrepreneurship Program. The program allows graduate students to spend a year addressing global issues. The Get Seeded program is also created and provides milestone grants to students.

2013 — The Lassonde Entrepreneur Institute is formed to involve more students and create Lassonde Studios. The institute adds related programs, including Innovation Scholar.

2014 — The Lassonde Entrepreneur Institute unveils plans for Lassonde Studios, a place for students to "live, create, launch." The five-story building features 400 unique student residences and a 20,000-square-foot student innovation space for meeting, prototyping and starting companies.

October 2014 — Coordination for "Get Seeded" begins.

April 2014 — The Lassonde Entrepreneur Institute announces plans for an additional $12 million to the University of Utah, bringing the total program commitments to $25 million. The new gift is used to help build an iconic new facility for student entrepreneurs.

2010-2012 — The Pierre Lassonde Entrepreneur Center continues to grow with the addition of new programs, including the Foundry, a business discovery center, and Bench to Beside, a medical device competition.

All students at the University of Utah and across the state are invited to participate in our numerous programs and activities. Opportunities include competitions, workshops, mentoring and living at Lassonde Studios.

### OUR MISSION

To provide students transformative experiences through entrepreneurship.

### COLLEGE STUDENT PROGRAM PARTICIPATION FY 2018

3.1K

See program detail on page 22.

### HIGH SCHOOL & MIDDLE SCHOOL OUTREACH PARTICIPATION FY 2018

7.7K

### ACADEMIC ENROLLMENT IN ENTREPRENEURSHIP FY 2018

1.2K
Hundreds of student teams work with us to launch ideas in every field and industry imaginable. A startup team is a group of students that access Lassonde Entrepreneur Institute programs to test, develop and grow their business idea, through mentorship, grants, office space and more.

### STARTUP TEAMS FORMED

**FY 2002-2018**

- **2002**: 1
- **2003**: 8
- **2004**: 4

- **2013**: $302
- **2014**: $362
- **2015**: $369
- **2016**: $405

### Summary

- **Total Startup Teams**: 1.3K (FY 2002-18)
- **Company Funding Raised**: $367M (FY 2002-18)
- **Number of Cash Prizes Awarded**: 125
- **Total Cash Prizes**: $2.6M
We are one of the top sources for scholarships at the University of Utah. Opportunities include scholarships to become a Lassonde student leader and housing scholarships.
The Lassonde Entrepreneur Institute programs are managed by student leaders from all corners of campus. These students learn by doing and gain a transformative experience by guiding others.
BY THE NUMBERS

SLICES OF PIZZA
5.2K
We served piles of pizza to students attending our many events and activities.

CUPS OF COFFEE
81K
Cups of free coffee consumed by our community at Lassonde Studios.

BAGS OF MARSHMALLOWS
40
One of our favorite evening activities is roasting marshmallows over our fire pit.

FT. OF 3-D PRINT FILAMENT
41K
Material printed by students in the Neeleman Hangar at Lassonde Studios.

STARTUP TEAMS
504
Our students launched hundreds of startup teams participating in our programs.

TOOL MENTORS
29
Tools mentors helped hundreds of their classmates learn tools and build things in our Make Space.

ENERGY BARS
30K
Students fueled their ideas with energy bars from the Miller Cafe.

WHITE BOARD MARKERS
1.2K
We used our white boards to make lists, sketch our thoughts and share inspirational statements.
Four hundred diverse students live in Lassonde Studios. Residents during FY 2018 were our second, or L2, group. Students from every major and background are welcome to #livecreatelaunch here.

**RESIDENTS FY 2018**

- 47% first year
- 47% upperclass
- 6% graduate

**ACADEMIC LEVEL**

LAUNCHED AT LASSONDE

We help students from all majors and backgrounds launch inventions, initiatives, companies and careers. Browse examples here and find more online at lassonde.utah.edu/launched.

HEALTH CARE

COLOCLEAN

An estimated 22.4 million colonoscopies are performed in United States each year. To perform an effective colonoscopy, the patient’s colon must be cleared of any organic material. However, according to biomedical engineering student Tobi Yoon, that isn’t always the case.

“Twenty-five percent of those patients don’t complete their prep or show up to their operation with organic material in their colon,” Yoon said.

ColoClean is a colonoscopy prep kit, that comes with anti-nausea medication, Miralax-type powder that has been condensed into pills and a colonoscopy-friendly cookbook.

“The end goal is almost like Blue Apron, but for colonoscopy prep, where you’ll receive this meal plan, like TV dinners that you can consume and stay satisfied while perpetuating your prep,” Yoon said.

After winning Bench to Bedside, a competition where students are given grants to develop their health-focused products or applications, while a senior in high school, Yoon and her partner, Chloe Fleischer, competed in the High School Entrepreneurship Challenge (HSUEC) where they took home the grand prize of $5,000. ColoClean is also participating in the Company Launch program at Lassonde Studios.

NEIGHBOR

All of us are familiar with peer-to-peer marketplaces like Uber and Airbnb. These disruptive companies are changing the way that we get around and how we travel. A University of Utah alum is disrupting the way you use storage. Neighbor, considered the “Airbnb of Storage,” is an online marketplace that connects hosts with extra space in their home to renters in need of storage. Just like other peer-to-peer marketplaces have done in their own markets, Neighbor is attempting to break into the $38B storage industry.

Colton Gardner, who majored in finance, cofounded Neighbor while at the University of Utah in 2016. His cofounder and BYU alum, Preston Alder, came up with the idea of Neighbor when trying to find cheap storage space for his possessions during a summer internship. After driving 2 hours to store his items in a family friend’s garage, he thought there must be empty garages closer to him that he could store in — and thus, Neighbor was born.

Gardner and Alder teamed up and utilized many of the Lassonde Entrepreneur Institute’s resources to help them get started. “Hours with Experts, Get Seeded, Opportunity Quest, and the Utah Entrepreneur Challenge were crucial to Neighbor’s success,” Gardner said.

CASE STUDIES

ESHOP TANZANIA

When Bonaventure Mhonda was a child in rural Tanzania, it would have been impossible for him to think he would do anything like graduate from the University of Utah with a master’s in finance and become an e-commerce entrepreneur.

In Tanzania, there is little industry, so they must import electronics and other supplies. But because the country is still developing and lacks reliable distribution channels, companies like Amazon and eBay are unable to operate. Mhonda wanted to solve this by creating an e-commerce platform and distribution network that would work in this location.

He was inspired to develop his idea when friends from Tanzania kept asking him to order things for them from Amazon then mail them to Africa. Mhonda wanted to find a way to do this on a much larger scale.

“Amazon won’t deliver here,” he said. “We don’t have physical addresses, and in order to buy, you need to have physical addresses. Also custom duties are always fluctuating and hard to track. You really need to have someone on the ground here.”

Mhonda graduated from the U in spring 2016 and returned to Tanzania to grow his business. He now lives in Dar es Salaam — “the New York City of Tanzania.” He is focusing on that country for now and hopes to eventually spread to neighboring countries and across Africa.

HEALTH CARE

BRUXIT

If you suffer from bruxism, you know the symptoms. Gnashing and grinding your teeth in your sleep causes sensitivity and teeth to flatten and chip. The standard of care for this condition is to just treat the symptoms — aspirin for the pain, a teeth guard for the tooth damage.

That is, until now.

A team of U students is developing a solution that could not only prevent the symptoms but also train people to stop grinding their teeth. Their startup company is called Bruxit.

Their solution is a mouth guard embedded with a circuit board, sensors and a vibrator. They are still refining the device, but they have a working prototype. When the person wearing it grinds their teeth, the device vibrates. In theory, it will wake them up, and over time, they will learn to not grind their teeth.

The team behind the device is interdisciplinary. It consists of Travis Neuberger, a bioengineering Ph.D. student; David Williams, an MBA student at Stanford with a master’s in bioengineering from the U; William Eccles, an MBA student at the U with a master’s in bioengineering; Parker Ence, an MBA student at Stanford; and faculty advisor John Langell, a surgeon and director of the U’s Center for Medical Innovation.

PUBLISHING

THE CARE TREE

“What are you giving your dad for Father’s Day?” asked Miles Petty, an MBA student at the University of Utah, to an unsuspecting audience at the Lassonde Entrepreneur Institute’s May, 2018, Get Seeded event.

“You don’t know yet? Well …” and then, to the surprise of the crowd, he followed up with a poem — rhyming “shirt or tie” with “the look in his eyes,” “the surprise,” a line about all the browser tabs and sites it takes to find a good gift — that ended with an introduction of his business, The Care Tree.

It was only appropriate that Petty incorporate a poem into his pitch — his startup has published two illustrated gift books that could be described as children’s books for adults. The first, a love poem called “I Love You Like …” considers a range of similes for love, from the whimsical to the sentimental. The second, an ode to the sacrifices of a mother.

The products seem to be doing well — not only did The Care Tree win $2,000 in funding for its milestone at the Get Seeded pitch, but several audience members wanted to buy on the spot from among the books and original greeting cards he had on display. The goal of the company is to grow from these current offerings to books for every big life event, along with cards, prints and other items.

LAUNCHED AT LASSONDE

LIT OUTDOORS

After a frustrating and nearly treeless camping trip to Goblin Valley in 2016, University of Utah students Daniel Goldfinger (geography) and Nick Bierwolf (mechanical engineering) came up with the idea for a “Tammock” — a device that combines a tent and a freestanding hammock that doesn’t require trees to work.

They are now developing the product, which features a lightweight frame and an easy-to-assemble design. They also launched the company LIT Outdoors. “LIT” stands for “life in tents.”

“Now in pre-sale development, our Tammock has applications for anyone who sleeps on the ground,” Goldfinger said.

Goldfinger and Bierwolf are also exploring ideas to promote social positivity using Tammocks at concerts, painting them in university colors and licensing them to schools as a place for students to relax.

“If we can produce them cheaply enough, we could even supply refugee camps where thousands die from Malaria caused by crappy sleeping conditions,” Goldfinger said. “Maybe we could decrease the number of people who die each year.”

LIT Outdoors has received support from the Lassonde Entrepreneur Institute, including office space from the Company Launch program and grants from the Get Seeded milestone grant program.

ITEM RESCUE

Beau Buehler, a University of Utah information systems student and founder of Item Rescue, saw a two-fold benefit in creating and providing the hospitality industry with an effective lost-and-found management system. When discussing how hotels generally manage their lost and found, he learned that current systems being used were very ineffective and required an excessive amount of time by hotel personnel to manage.

Additionally, when surveying guest confidence in obtaining items left behind, most people expressed an overwhelming lack of confidence in hotels ability to return their items. “Item Rescue is all about making it easier for guests to get their items back and providing hotels an effective way to do it,” Buehler said.

“It can be stressful to lose something of value and a hotel that can turn that negative experience into a positive one will have more satisfied and loyal guests.”

The application allows hotels to easily manage their lost-and-found inventory, to automatically notify guests of lost items, to ship items back to guests and to collect high-quality reviews on top review sites.

The Item Rescue system is being effectively utilized in numerous hotels, and Buehler is excited about the company’s projected growth and potential.

SOLE CASE

At the young age of just 10 years old, Sole Case Display’s founder Charles Rind already had a passion for footwear and fashion. “In 2003, I first laid my eyes on the patent leather Air Jordan 1 Retro sneaker in the Chicago Bulls colorway,” he said. “Ever since that moment I was hooked.”

A year later, at 11 years old, Rind began his own collection.

As his collection grew, Rind immersed himself in the “sneakerhead” community. He quickly realized that he and the community were frustrated by the lack of high quality storage solutions for the fashion-forward consumer. The companies that were attempting to tackle this problem left a void where the essence of luxury was lost when storing these shoes. So, Rind seized the opportunity to fill this void.

With resources at the Lassonde Entrepreneur Institute at the U, Rind launched Sole Case Displays and the company’s first product, the Sole Case.

The Sole Case is made of high quality 5 mm acrylic with a drop front door for easy access to the footwear and has the unique ability to lock onto and stack on other Sole Cases. Their ultimate goal is to build the company into a brand that represents a community and the cultures that surround it. Their unique branding and materials are what separates them from the competition.

CLOTHING

CURRIE WEAR

After noticing a huge gap in clothing for young girls, Hillary Whitaker, a University of Utah accounting student, started Curie Wear in 2016, a company that designs custom fabrics focused on STEM. They keep their clothing designs feminine for young girls. As Whitaker said, “It is important to emphasize femininity and let girls know it is important and special to be a girl while still loving bugs and astronauts.”

Whitaker was inspired by Marie Curie, the first female to win two Nobel prizes in different fields — one in chemistry and one in physics. Whitaker wants to help young girls follow in Curie’s footsteps by finding an interest in a STEM subject while still focusing on being feminine.

When Whitaker’s daughter was born, she and her husband were looking for clothes with dinosaurs and rocket ships on them and didn’t have any luck. This is when Whitaker decided to design her own fabric. They now have custom fabrics like the constellations and the periodic table, and of course, dinosaurs and rocket ships.

Whitaker wants to show women in STEM that it is okay to wear dinosaurs, but she doesn’t want them to be called a boy.

FASHION

LUKU WATCHES

Fas Lebbie, an international studies and entrepreneurship student at the University of Utah, has a growing list of ventures in brand marketing and UX/UI design. One of those ventures is founding Luku Watches, a sleek rendition of urban hip-hop style about to disrupt timepiece fashion.

“Luku is more than a watch company,” Peters said. “We’re building a culture, not an investment.”

Peters brought the Luku Watches crew of student collaborators together, including fellow marketing student Drew Kiel, who handles marketing and company email. Kiel loves the entrepreneurial process and does whatever needs to get done like every member of the team.

FOOD

DEZIRIA CHOCOLATES

Passion for chocolate has always had easy access and exposure to the high-quality chocolate with a variety of flavors. Bozkurt, Erdagoz and Oniz Birsoy, Bozkurt’s wife, wanted to help make it more accessible in Utah.

Erdagoz’s comment ignited the idea to startup a business for Bozkurt who has years of experience in the food industry in Utah. Bozkurt said, “That is why and how we launched our chocolate business in early 2017.”

During her MBA study at the U, Birsoy, who graduated in 2009, was already familiar with the exceptional programs available at the Lassonde Entrepreneur Institute (then called the Lassonde Entrepreneur Center). She said, “I know the perfect resource to get the necessary information and support to get started, the Lassonde Institute.”
